

REAL EXCEL SCENARIOS

ASKED IN INTERVIEWS

1

SALES ANALYSIS

Identify Top 5 Products from Monthly Sales

SCENARIO

Find the Top 5 Best-Selling Products

APPROACH

- 

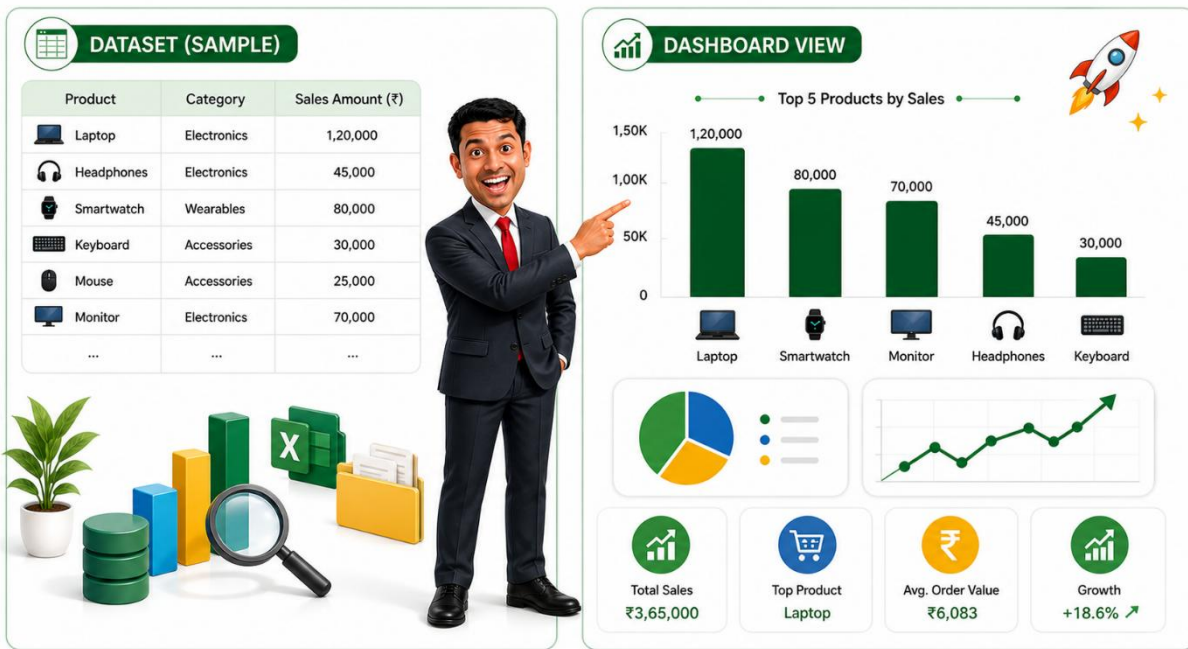

Use Pivot Table
- 

Sort Descending
- 

Top N Filter

Continued...

Continued...

TOOLS / FUNCTIONS USED

PIVOT TABLE
Summarize sales data by product

SORT (DESC)
Sort sales in descending order

TOP N FILTER
Filter top 5 products

These tools help turn raw data into top-performing insights!

BUSINESS IMPACT

Identify top-performing products quickly

Optimize marketing spend on best sellers

Improve inventory planning & stock availability

Drive higher sales & revenue growth

Happy Customers

Business Growth

Higher Profit

Sustainable Success

REAL WORLD APPLICATION

E-commerce

Focus on promoting best-selling items during flash sales.

Retail Stores

Stock more of top products to meet customer demand.

Marketing Teams

Create targeted ads for top-performing products.

Management

Make data-driven decisions for better business strategy.

TIP: Master this scenario to analyze sales data, find key insights, and make smarter business decisions!

Practice. Learn. Grow!

2 DATA CLEANING

Clean Your Data for Accurate Analysis

REAL WORLD EXAMPLE

BEFORE CLEANING

❌

Emp ID	Name	Department
101	Ravi	Sales
102	neha	HR
102	Neha	hr
103	Amit	Sales:
104	Pooja	Finance
105	ravi	sales

AFTER CLEANING

✅

Emp ID	Name	Department
101	Ravi	Sales
102	Neha	HR
103	Amit	Sales
104	Pooja	Finance
105	Ravi	Sales

OUTCOME

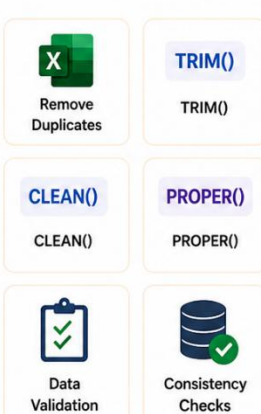

Clean, consistent & reliable data for accurate analysis

STEPS / APPROACH

- 1 Remove Duplicates**
Icon: Two person icons, one with a magnifying glass.
- 2 Trim Extra Spaces**
Icon: "Text " → Text
- 3 Standardize Text**
Icon: abc → ABC
- 4 Validate Data**
Icon: Checklist with a green checkmark.

TOOLS / FUNCTIONS USED

BENEFITS

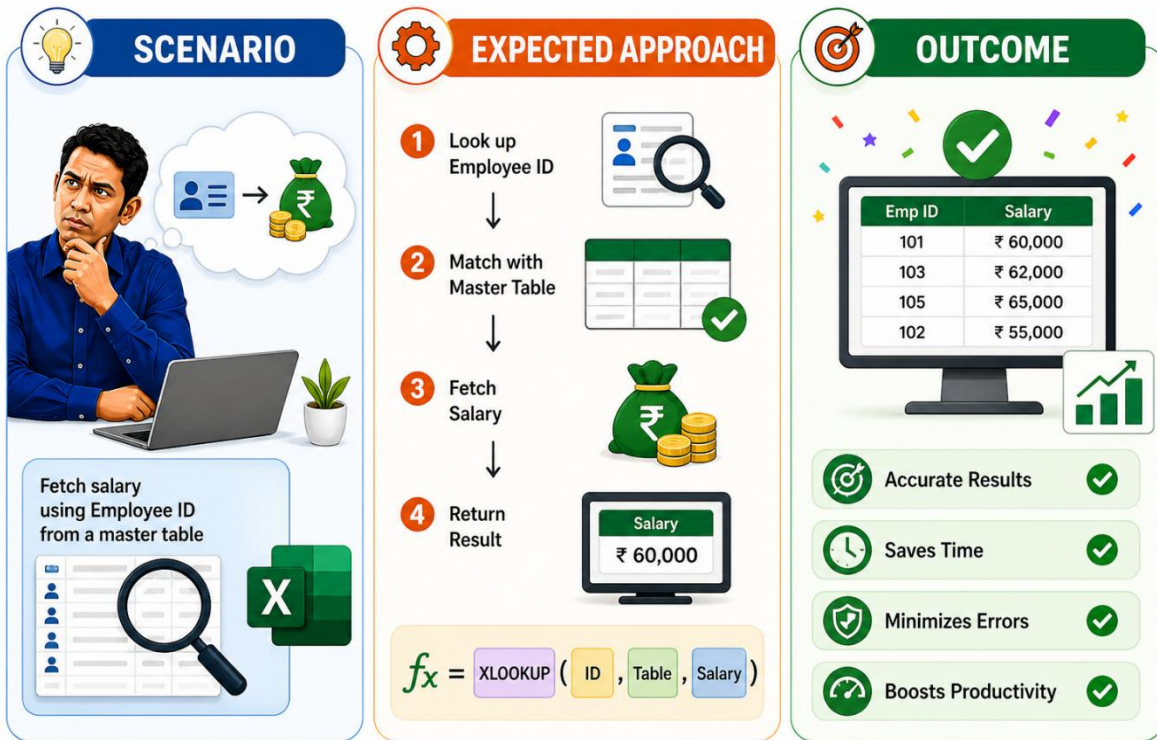

REAL WORLD APPLICATIONS

3 LOOKUP PROBLEM

Fetch Salary Using Employee ID

4

CONDITIONAL LOGIC

Apply Conditions. Get Smart Results.

Make your data think before you decide!

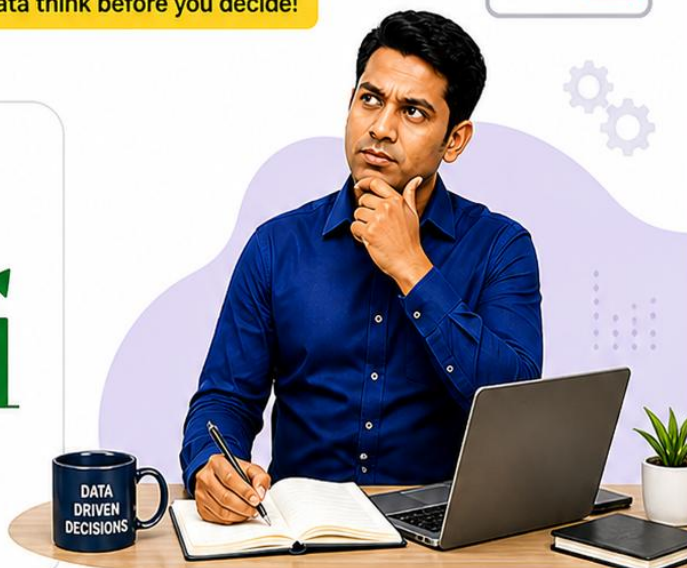

SCENARIO

You want to identify high performers based on sales target.

Condition:

If Sales > 50,000
then High,
else Low.

EXPECTED APPROACH

Use IF function to apply logic.

Sales > 50,000
(Condition)

High
(True)

Low
(False)

Formula:

=IF(A2 > 50000, "High", "Low")

1 Check
Condition

2 If TRUE
(Sales > 50,000)

3 If FALSE
(Sales ≤ 50,000)

4 Get Smart
Results

5

REPORT GENERATION

Create Smart Reports. Drive Better Decisions.

SCENARIO

You need to create an interactive dashboard to analyze sales performance by region and product.

Pivot Table

Summarize data efficiently

Pivot Chart

Visualize trends and comparisons

Slicers

Add interactivity and filters

Dashboard Layout

Present insights clearly & effectively

EXPECTED APPROACH

1 RAW DATA

Sales Transactions

Date	Region	Product	Sales (₹)
01-May-24	North	Laptop	75,000
02-May-24	South	Mobile	45,000
03-May-24	East	Tablet	28,000
04-May-24	West	Laptop	60,000
05-May-24	North	Mobile	55,000
...	...	...	...

2 DATA PROCESSING

Using Pivot Table

Row Labels	Sum of Sales (₹)
North	1,30,000
South	95,000
East	72,000
West	60,000
Grand Total	3,57,000

3 DYNAMIC DASHBOARD

Interactive & Insightful

- ✓ Summarize large data in meaningful format
- ✓ Create visual insights with charts
- ✓ Add interactive filters for quick analysis
- ✓ Present clear insights for better decisions
