

JANAKI RAM VALLAPU

Data Analyst | SQL | Power BI | Python | Excel

+91 888-511-0131 | janakiramvallapu@gmail.com | Portfolio | LinkedIn | GitHub | Hyderabad, Telangana

PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Power BI, and Excel, with hands-on experience delivering end-to-end analytics projects. Proficient in data cleaning, EDA, data modeling, dashboard development, and KPI reporting to support data-driven business decisions.

TECHNICAL SKILLS

Languages: SQL, Python

Analytics & BI: Excel (VBA, UserForms, VLOOKUP, XLOOKUP, INDEX-MATCH, Pivot Tables), Power BI, DAX, Power Query

Database & Tools: MySQL, Jupyter Notebook, Git, VS Code

Data Analysis: Data Cleaning, Data Transformation, Data Validation, EDA, Dashboard Development, KPI Reporting

RELEVANT PROJECT EXPERIENCE

Loan Approval Data Analysis | SQL | Python | Power BI (DAX) | GitHub 2026

- Cleaned, transformed, and validated a 614-record loan dataset using Python (Pandas), handling missing values, removing inconsistencies, and preparing analysis-ready data.
- Conducted exploratory data analysis (EDA) to identify key drivers of loan approval by analyzing applicant income, credit history, loan amount, and demographic patterns.
- Developed an interactive Power BI dashboard with a star-schema data model, DAX measures, KPIs, and slicers to identify low-risk applicant profiles and support faster approval decisions.

Employee Attrition Analysis | Python | MySQL | Power BI (DAX) | GitHub 2026

- Analyzed 1,470 employee records using Python/Pandas and MySQL to identify workforce segments associated with elevated attrition.
- Wrote 25 SQL queries using conditional aggregation, subqueries, CTEs, window functions, and ranking to analyze employee income segments.
- Built a six-page interactive Power BI dashboard with DAX measures to analyze attrition, compensation, and high-risk segments; identified 64.1% attrition among 18–25 overtime employees, highlighting retention priorities.

SmartBiz Pro – Excel Business Automation System | Excel | VBA | UserForms | GitHub 2026

- Developed an end-to-end Excel VBA application to automate product, customer, supplier, purchase, sales, inventory, and invoice workflows.
- Built multi-item sales processing with automatic stock updates, low-stock alerts, tax and discount calculations, invoice generation, and one-click PDF export.
- Created a live KPI dashboard and reporting center using Excel Tables, PivotTables, PivotCharts, structured-reference formulas, and VBA-driven refresh automation.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology 2025

Malla Reddy Engineering College (MREC), Hyderabad

CERTIFICATIONS

SQL (Advanced) Certificate | HackerRank 2026

Data Analytics & Business Analytics | Naresh IT 2026

Advanced Excel Mastery | Skill Course 2026

ACHIEVEMENTS

- Earned the HackerRank SQL Gold Badge with 650 points through SQL problem-solving challenges. 2026
